

**MOLOKAI  
COMMUNITY  
HEALTH CENTER**

# MOLOKAI OHANA HEALTH CARE INC.

**MISSION:** To provide and promote accessible comprehensive individual and community health care to the people of Molokai with respect and aloha.  
**VISION:** All people have optimal physical, mental and spiritual health.

**Molokai Community Health Center**, a Federally Qualified Health Center on the island of Molokai, Hawaii, was established in 2002, and opened its doors in March 2004. MCHC is a 501(c)3 not-for-profit that provides primary health care, dental health care, behavior health care, WIC, and enabling services. MCHC provide accessible, affordable health care to over 2,300 patients per year. In 2018, MCHC had a total of 5480 medical visits, 3048 dental visits, and 364 behavioral health visits. 47% of MCHCs patient base is 19 & under, and 15% are 65 & older.

## Community Need

The major health care challenges of the target population include maternal and child health risk, baby bottle tooth decay, childhood asthma and obesity, teen substance abuse, and chronic health conditions in adults, including diabetes, asthma, heart disease, high blood pressure, obesity, behavioral health illnesses and substance abuse.

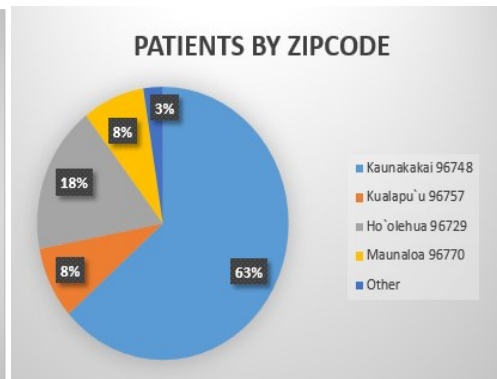

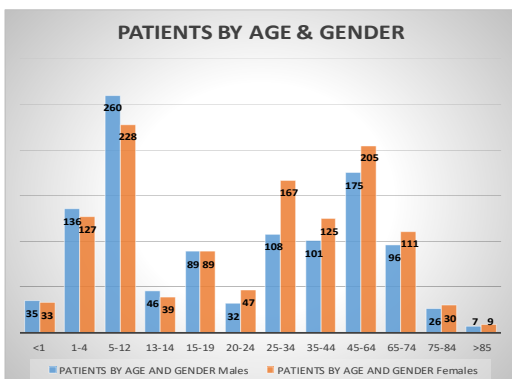

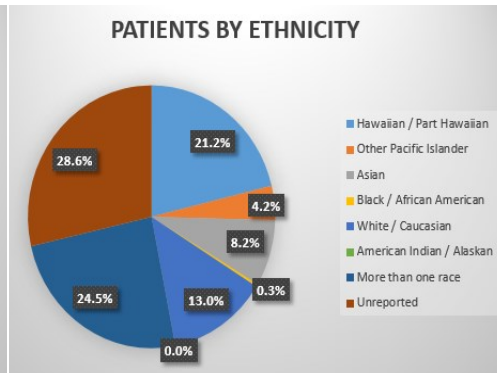

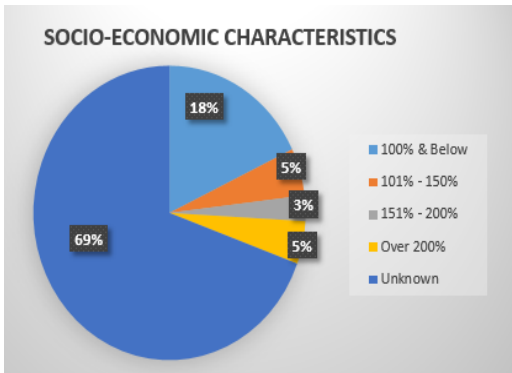

Molokai's unique health needs stem from the island's geographic isolation and limited resources. The island of Molokai has one of the lowest overall rankings in the state in measurements of economic health, socio-economic stability and food security.

Molokai has an unemployment rate of 4.9%. About 7% of the island is uninsured. A reported 40% of the population rely on subsistence farming, hunting, and fishing.

Poverty, language, geographical isolation, lack of health insurance and the high cost for off-island travel are the primary access barriers to comprehensive health care on Molokai.

## Key Achievements

- ◆ Reach Out and Read –2018

## What are Federally Qualified Health Centers (FQHC)?

Federally Qualified Health Centers are the largest “safety net” providers in Hawaii, serving over 67,000 patients annually. Wherever they’re located, community health centers are about helping people remove barriers and gain access to the health care they need.

## What is a Patient-Centered Medical Home (PCMH)?

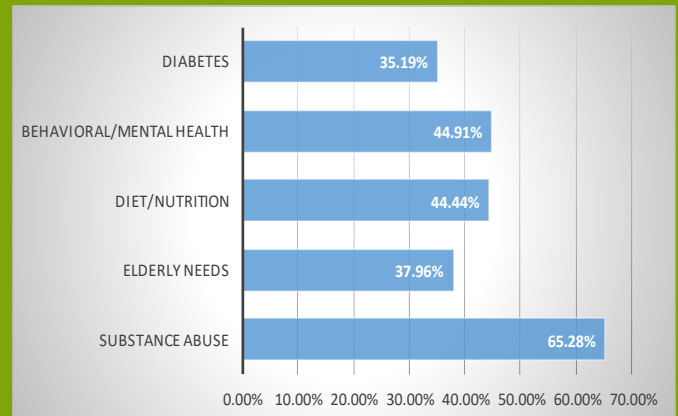

With a commitment to providing the best medical care based on individual health needs, MOHC has achieved Level 3 PCMH (patient-centered medical home) recognition in May 2015.

The National Committee for Quality Assurance’s (NCQA) PCMH recognition program follows a set of comprehensive standards to facilitate partnerships between individual patients, their personal physicians, and when appropriate, the patient’s family, to support a team based approach to care.

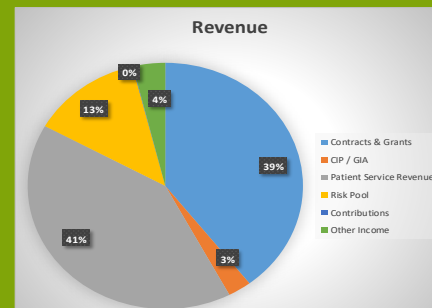

The patient-centered medical home (PCMH), is a team based health care delivery model that provide comprehensive and continuous medical care to patients with the goal of obtaining maximized health outcomes. PCMH offers a high standard of service to our patients and clients.

## Health Issues Facing Our Community
